

To whom it may concern:

While there is not a local traffic and weather channel for my city, I have used them while traveling through other cities. I feel that it would be ridiculous to ban these channels; they are very helpful to travelers with satellite radio while in a city that has the local traffic channel. As we are paying for the satellite radio service it should left alone just the cable television market. If you ban it on satellite radio you would have to ban it on cable TV.

Thank You
Garry Geiselman
